

NAME: _____ MONTH: _____ Scientific Articles Log

Instructions: Every time that you read a scientific article, please write down the title and the date read and indicate whether you discussed the article with someone such as your mentor, another student, or in a journal club. Also indicate the main finding of the paper or why would you cite this paper in a manuscript that you were writing.

Once a month, Wendy will collect the logs to keep in your student folders. Once a semester, we will evaluate the amount of reading by each student and the group overall.

Purpose: First, we want to get an idea of how many articles our students read and discuss. This will allow us to implement activities to increase your reading if necessary. Second, this activity will give you an idea of how many or how few articles you are reading. Often we are not aware of our activities without a log. Third, this gives you practice at cataloging the articles that you have read which will make it easier to do citations when writing a manuscript, proposal, thesis etc.

Title:

Date read:

Discussed with someone? Yes / No

Main finding:
