CLINICAL TRAINING MODEL

The competencies that students need to develop to become professional school psychologists are multiple and complex. These competencies are only developed through practical experiences in supervised contexts. Therefore, the clinical practice component of the School Psychology program of PHSU pays special attention to the processes through which students develop the competencies of the profession. Specifically, our model stipulates that graduate will be proficient in building relationships, especially with those suffering from psychological distress. They will be able to utilize their relationship skills to perform evaluations of patients’ circumstances and of their psychological functioning. Our students will develop competencies in the administration and interpretation of psychological tests. Likewise, students will acquire intervention competencies in a range of approaches and modalities which are a significant component of the clinical skills available to professional School Psychologists.

To achieve the goal of providing its students the clinical skills of the profession, the Master of Science in School Psychology Program at Ponce Health Sciences University (PHSU) offers its students the following experiential components:

1. Practicum seminars emphasizing clinical skills.
2. School Clinical practice in designated practicum sites.

The practicum component of the program is structured in a sequential manner in order to foster the progressive acquisition of school & clinical skills. The sequence is as follows:

Practicum Coding and Name	Year & Semester	Number of Hours
SCP 5810 Introduction to Clinical Practice Clinical Practice I	Year 1 semester 1	30
SCP 5820 Fundamentals of Clinical Interventions and Emergency Psychology Clinical Practice II	Year 1 semester 2	30
SCP 6830 Psychotherapeutic Techniques Clinical Practice III	Year 2 semester 1	230
SCP 7860 General Clinical Practice: Integration I Clinical Practice IV	Year 2 semester 2	230
SCP 7890 School Psychology Practicum	Year 3 Semester 1	230

During the first semester of the first year students register in SCP 5810, through which they develop basic interviewing and clinical skills. For the second semester of their first year students register in SCP 5820 and complete a minimum of 30 hours of clinical instruction. This experience includes the opportunity to practice clinical skills within the safe environment afforded by the Standardized Patient Program.

During the two semesters of the second year, students complete 400 hours of clinical practice in a designated school or clinical site and 60 hours of academic instruction while registered in the SCP 6830 & SCP 7860. The clinical experiences in practicum sites allow students to gain further exposure to clinical work and to spend more time in the acquisition and refinement of clinical skills. The instructional component of SCP 6830 focuses on the discussion and application of interventions, including psychotherapeutic techniques. At their practicum sites, students perform intake assessments, case conceptualizations, treatment plans, and provide individual or group psychotherapy. During the first semester, they may also conduct cognitive assessments. All students are supervised by an on-site licensed school or clinical psychologist.

During the second semester of the second year, students again have the opportunity to practice their clinical skills, in the same or in a different setting. At this level of the training sequence, students register in SCP 7860, which is designed to assist students in learning to integrate acquired knowledge with diagnostic and general school and clinical skills. At this stage of the program, every student has approved the cognitive and personality evaluation courses. It is expected students will utilize these skills throughout the third year to gain a better understanding of the cases seen at their practicum site. The didactic component of the practicum also focuses on exposing students to empirically validated procedures. While at their practicum sites, students continue to meet weekly with their supervisors to discuss their clinical experiences and to continue with the development of advanced skills in the integration of clinical data and in implementing intervention strategies and techniques.

During the first semester of the third year, students will be exposed to a more advanced level of school clinical integration. The School Psychology Practicum (SCP 7890) focus on assist students in integrating the knowledge obtained in Psychoeducational Assessment and in the child psychopathology course to the actual work with students in academic settings. Placements will be in school throughout the island.

Students will complete a minimum of 600 hours of practice in their practicum setting. For each practicum experience, students should complete 100 face to face contact hours for a minimum of 300 face to face hours for all practicum experiences. These face to face hours include clinical intake, crisis interventions, psychotherapy (individual, group, and family), shadowing, consultation and testing. The shadowing hours will amount to .5 of the total reported (e.g., of 20 shadowing hours reported, 10 will account as face to face). Record keeping, case management, training, administrative services, staff meetings and supervision hours will be recorded as supplemental hours. If the student cannot complete the 100 face to face contact hours per semester, the Coordinator of Clinical Practice (CCP) and the student will sign an agreement stating the amount of hours owed for the semester and the specific plan to complete them.

EVALUATION OF PROGRESS

Student Evaluations

Students receive two performance evaluations from their site supervisor during each semester. The first evaluation is conducted at mid-semester (beginning of October/ March) and the second at the end (December/May). The evaluation form is included in Appendix B.

Evaluation of Relations Competence

The supervisor should also complete and submit the Relations Competence Evaluation Form (Appendix C) for each supervisee at least once during the semester. Any concerns in this area will receive immediate attention by the CCP and the program administration.

Site and Supervisor Evaluation

The student will evaluate the practicum site and the clinical supervision received at the end of the practicum experience. The evaluation form to be used to is found in Appendix D.

Students enrolled in school psychology practice are responsible for obtaining and submitting the evaluations and other requirements of the practicum to the CCP in a timely manner. No grades will be posted in a student's transcript until all evaluation forms are turned in.

Grading of Clinical Practice Seminars

The practicum hours are credited by the office of the CCP, based upon the practicum log in Time2Track. This log is signed by the student's clinical supervisor and the student must submit it to Time2Track system each month. By the end of the semester, the CCP informs the professor of the practicum seminar about the student's performance in their practicum site and the number of hours completed. If the student's performance is evaluated as satisfactory by the practicum supervisor and the number of hours logged for the semester is acceptable, the CCP will certify the student's approval of the practice and of the seminar by using the designation "Pass" (P) or "Not Pass" (NP).

Remediation of school clinical skills deficiencies

Remediation of clinical skills deficits detected through clinical practicum is required when ratings on the *Student/Trainee Evaluation Form*, and *Evaluation of Student Competency of Relations* indicate unsatisfactory performance (Total score less than 3.0 in each section). This procedure is also activated when unsatisfactory performance is detected through any other written evaluation method in use at any practicum site, in addition to the Student/Trainee Evaluation Form. Based on the information collected, a remedial plan is developed by the CCP in consultation with the student's practicum supervisor and academic advisor. The student receives a letter from the CCP stating the steps to follow to benefit from the plan, the expected amount of time required to complete, and the possible consequences of non-compliance,

including a referral to the Students Promotions Committee for consideration of other actions that may include dismissal from the program.

SCHOOL CLINICAL PRACTICUM SITES

Affiliation

Each practicum site has an affiliation contract with PHSU. The CCP is responsible for coordinating contracts, handling issues related to students' malpractice insurance, assigning students to their practicum sites, and securing all pertinent documentation related to students' practice. Any situation related to students in practicum or to their practicum sites will be reported to and handled by the CCP.

Criteria for certification of practicum sites

To assure the availability of adequate training sites, PHSU has engaged in multilateral affiliations and agreements with local agencies and organizations. The primary focus of these organizations is the delivery of health, mental health, and psycho-educational services to their constituents. These organizations provide the resources needed by our students to develop their clinical and intervention skills and to forge their identity as professional school psychologists. To achieve this goal, practicum sites must satisfy the basic requirements set forth by our program. These requirements are:

- The site must be engaged in the delivery of health-related, educational or social/community services to individuals (children and adolescents), or families.
- Administration and staff supervision must be conducted by licensed health professionals.
- The training site must abide by the appropriate standards of safety that protect students, employees and the persons served from potentially dangerous or risky situations.
- An individual within the organization is designated to supervise and facilitate the student's training program. This person should be a licensed school psychologist or psychologist with a master or doctoral degree.
- There might be instances in which the requirement of a psychologist with a master or doctoral degree may be waived, given the characteristics or experiences obtained in the practicum site. In case that a licensed psychologist with doctoral degree is not available on site, two requirements must be met:
 1. A licensed health or mental health professional will provide all the guidance and support required for the assignment of cases and will guarantee that students have all the resources needed to benefit from the practicum experience.
 2. The student will be supervised on a weekly basis by an assigned field licensed supervisor. An organization may request that a particular student is assigned to

the site, based upon mutual interests. However, no student will accept or ask to rotate through a practicum site without the consent of the CCP.

In order to provide diverse experiences, students are usually not allowed to remain in the same practicum site for more than one semester. Nonetheless, under special circumstances, this requirement may be waived. The training experience begins and ends according to the calendar of each training site. Those training calendars do not necessarily correspond to the academic calendar.

Students cannot practice in any site without previous authorization from the CCP and/or the Program Director. This policy includes summer research experiences in or outside the Program. Students are not allowed to continue providing clinical services to the center's clients after completing their rotation every semester.

Primary Responsibilities of Practicum Supervisors

- ❑ Provide guidance and advice to students throughout their training and serve as professional mentors.
- ❑ Enable students to become thoroughly familiar with the policies and procedures of the practicum site.
- ❑ Develop graded, sequential experiences for students that will prepare them to assume entry-level responsibilities within the field of Professional School Psychology.
- ❑ Complete, with the student, the "Students Practicum Contract" (Appendix A) and provide the expected amount of weekly individual supervision of at least 1 hour.
- ❑ Screen and assign to students cases of adequate levels of complexity.
- ❑ Review the cases assigned to students on a regular basis.
- ❑ Verify that the student completes all forms and required paperwork
- ❑ Address in supervision sessions the scientific basis of school psychological practice, professional ethics, and topics related to managed care and its effects on health care systems.
- ❑ Provide guidance and encouragement for students to progressively acquire independence in their clinical functioning.
- ❑ Keep the student, as well as the CCP, informed as to the student's progress through both, formal evaluation forms and through informal verbal feedback.

GUIDELINES FOR SCHOOL CLINICAL PRACTICE

ETHICAL STANDARDS

Students will abide by the ethical standards of the American Psychological Association with regards to professional behavior and to delivery of clinical services. Students will follow all rules and regulations of Ponce Health Sciences University and will conduct themselves according to applicable legal standards. Any concern about the student's professional behavior in the clinical setting will be addressed according to PHSU policies and due process.

The safety of clients and issues related to dual relationships are considered to be among the most important aspects of ethical behavior to be observed by all students. It is the responsibility of the students to evaluate for the presence of dangerousness to self or others in the clients served. Likewise, situations of child or elderly abuse need to be reported according to the applicable law. Issues of domestic violence and of abuse to women and children in any form will be handled with utmost care.

DRESS CODE

The way in which a student dresses to attend their school clinical sites has particular significance at different levels. Adequate clothing transmits a sense of professionalism and respect for patients and for the professional staff of the training site. Attire should be consonant with the setting of practice, with the weather and the time of the day. Shorts, running shoes, blue jeans, women pants that are skin-tight, or clothes that excessively expose portions of the body (except arms and legs from the knee down) are not acceptable clothes to be wear on a Practicum site. However, sites that serve children predominantly usually tolerate (and at times require) less formal attire and running shoes. Male students are encouraged to use long or short leaves shirts with tie.

DOCUMENTATION OF CLINICAL ACTIVITIES

The student will document each intervention performed with a patient, with his/her collaterals or with any other person involved in the case. The **SOAP** model is recommended to orient progress notes. The **DAP** model is likewise acceptable. However, the student will utilize whichever system is utilized or required by their Practicum site. When the Practicum site does not promote a particular system, the student is expected to utilize SOAP (preferably) or DAP. The student needs to remember that failure to document sessions or crucial information about patients being served constitutes a serious infraction of the ethics of school clinical practice.

SUPERVISION

Each student will have at least one hour of individual supervision each week. The student may cancel a supervision appointment but only when the circumstances that prompted such cancellation justifies such action. Any supervisor may require objective proof of such justification. All supervisory session will be documented and countersigned by the supervisor. Students must receive at least one direct/in vivo supervision per semester.

DOCUMENTATION OF TIME IN CLINICAL TRAINING

Students will enter their clinical practice hours through their Time to Track accounts. This service is included in all students' fees and except for extraordinary circumstances, no paper logs are accepted. Students receive a thorough orientation to the use of this system prior to beginning their first practicum. The CCP and the Assistant Dean for Clinical Training serve as system administrators for students' accounts and provide guidance and assistance in the use of the system.

EVALUATION FORMS

Besides the monthly log, students in practice have the responsibility of obtaining and submitting on time to the office of the CCP, all the required evaluations in original.

- Teaching-Learning Contract: at the beginning of every year (Appendix A)
- Site and Supervision Evaluation by Student: end of semester (Appendix D)

All practicum students will be evaluated by their supervisors as described above. The CCP will make a request for evaluation to students' supervisors via the Time2Track system. The CCP will receive the completed evaluations, already reviewed and discussed with the student, via Time2Track. Additionally, the following documents are submitted via the Time2Track system

- Student Evaluation by Supervisor: mid semester and end of semester (Appendix B)
- Evaluation of Relation Competency by Supervisor: one of each semester (Appendix C)

PROCEDURE TO FOLLOW WHEN STUDENTS PRESENT HEALTH PROBLEMS DURING CLINICAL PRACTICES

The whole health of each student is vital to obtaining an adequate supervised practicum experience. We strive to ensure the well-being of students, supervisees, and the people who receive our services. For such purposes, we adopt the following procedures when health problems arise during practicum experiences:

When the student, administrator of the site, or supervisor identifies that any practicum student is experiencing a health problem of a physical or emotional nature, they must ensure that such student receives the necessary medical/psychological care and keep the recommended rest. If the condition requires more than two weeks of rest, it is recommended that the student applies for a Leave of Absence (LOA). To be able to return to their site, the physician or psychologist who provides the health services must certify that the student is ready to retake their practicum responsibilities. The academic advisor must be aware of and collaborate in the necessary coordination to support the student in the required process. The supervisor and the student (to the extent possible) will be responsible for ensuring the transfer of patients as necessary.

The Practicum Coordinator must be notified of each case and will meet with the parties to clarify any doubts. She/he will inform the program director and recommend a referral to the counseling department as deems necessary. The director should use the Student Assessment Committee (SAC) referral form for such a purpose.

Students have the responsibility to notify the supervisor of any physical or emotional health issues limiting their practicum experience. Practicum students must also abide by supervisors' recommendations at the site or in the academic program about remaining or not in the practicum site during the corresponding semester. As far as possible, the student must collaborate to transfer the cases they are assisting. Under no circumstances will the safety or the best well-being of patients be put at risk.

If a practicum student refuses to follow this policy and procedure or the recommendations offered, it will be treated as a professional behavior fault. The program director or the SBBS dean could refer the student to the professional conduct committee (PCC) for evaluation and recommendations. Based on the advice of the PCC, the dean will decide the action to be taken, which may include a referral to the Promotions Committee with a recommendation of dismissal from the academic program.

HANDLING OF CLINICAL EMERGENCIES

Students will identify the site supervisor designated to assist students in handling crises and emergency situations and will request a copy of the procedures utilized in the site to address such situations. Any case that may present as potentially dangerous or may pose a risk will be consulted immediately with the corresponding supervisor.

If the site supervisor is not available at the time when the emergency occurs, students will call a PHSU supervisor or advisor for instructions and support. In the absence of that person, the student will contact the CCP. If contact with the supervisors on call through mobile phone is not possible, the student will call the Program's office, the Director of the Program, or any other clinical professor available. The supervisors on call are:

Teacher-Supervisor	Telephone
Dr. Rebecca López	787-246-6524
Dr. Licelott Maldonado	787-638-3778
Dr. Laura Deliz	787-233-1426

Trainee _____ Supervisor _____

Date _____ Site _____ Midterm _____ Final _____

1 = unacceptable	4 = average	N = no info.
2 = poor	5 = above average	on which to rate
3 = needs improvement		

1. Interpersonal Relations & Personal Qualities

A.	Works well with other staff	1	2	3	4	5	N
B.	Is sensitive to and able to establish good rapport with patients	1	2	3	4	5	N
C.	Works well with families & collaterals	1	2	3	4	5	N
D.	Exhibits maturity & responsibility	1	2	3	4	5	N
E.	Is able to function independently	1	2	3	4	5	N
F.	Shows good initiative in projects	1	2	3	4	5	N
G.	Sees assignments through to completion	1	2	3	4	5	N

2. Supervision

A.	Accepts supervision	1	2	3	4	5	N
B.	Applies supervisory feedback	1	2	3	4	5	N
C.	Is open & receptive to new ideas	1	2	3	4	5	N
D.	Is on time and prepared	1	2	3	4	5	N
E.	Is in contact with Supervisor at all times	1	2	3	4	5	N
F.	Discusses/presents her/his ideas or recommendations about case management , has initiative.	1	2	3	4	5	N
G.	Is able to consider transference/counter-Transference as part of therapeutic interventions and her/his personal growth.	1	2	3	4	5	N

3. Therapy Skills

A.	Shows good grasp of therapeutic techniques	1	2	3	4	5	N
B.	Is able to clearly conceptualize patient needs	1	2	3	4	5	N
C.	Skills in individual therapy	1	2	3	4	5	N
D.	Skills in group therapy	1	2	3	4	5	N
E.	Skills in family therapy	1	2	3	4	5	N
F.	Is open and willing to tape sessions	1	2	3	4	5	N
H.	Shows empathy skills in the interview/ intervention process.	1	2	3	4	5	N

4. Assessment Skills

A.	Administration & interpretation of cognitive procedures	1	2	3	4	5	N
B.	Administration & interpretation of projective techniques	1	2	3	4	5	N
C.	Administration & interpretation of objective personality tests	1	2	3	4	5	N
D.	Behavioral assessment	1	2	3	4	5	N
E.	Others (specify)_____	1	2	3	4	5	N
F.	Sophistication in forming impressions, recommendations, and diagnostic conclusions	1	2	3	4	5	N
G.	Quality of written reports	1	2	2	4	5	N

5. Team Meetings/Case Conferences

A.	Is an active participant & contributor	1	2	3	4	5	N
B.	Is organized and presents well	1	2	3	4	5	N
C.	Is on time and prepared	1	2	3	4	5	N

6. Writing Skills

A.	Exhibits skills as a professional writer	1	2	3	4	5	N
B.	Progress Notes are clear and concise	1	2	3	4	5	N
C.	Asks for help in editing	1	2	3	4	5	N

7. Diversity

A.	Awareness and Respect for Diversity	1	2	3	4	5	
B.	Development and implementation of intervention plans that are sensitive to issue of diversity	1	2	3	4	5	

8. Other (please specify)

_____	1	2	3	4	5	N
_____	1	2	3	4	5	N

9. Methods of Feedback / Evaluation:

- () Participation in weekly supervision meetings
- () Revision of records
- () Case discussions
- () Revision of psychological reports
- () Discussion of midterm and end of semester evaluation
- () Participation in case conferences and training
- () Use of case narratives
- () Use of audio tapes
- () Use of video tapes
- () Electronic Method (Example: Skype)
- () One way mirror
- () Direct- in vivo supervision
- () Other: _____

Narrative Evaluation: **(Please provide a narrative evaluation of the student. Be sure to address any ratings of 3 or below in the above evaluation by specifying the problem and a suggested course of correction.** Otherwise provide a general overview of the student's skills as a psychologist and any areas of needed growth or development. The data are to be used as feedback to enhance the student's overall training and preparation.)

THE ABOVE RATINGS AND THE NARRATIVE EVALUATION HAVE BEEN DISCUSSED.

Appendix C
Evaluation of the Competency of Relations

To: Clinical Supervisors
Ponce Health Sciences University
Master of Science in School Psychology Program

From: Heidi Arroyo, Psy.D.
Coordinator School Psychology Program
Stephanie Vega, Psy.D.
Coordinator of Clinical Practica

Re: Evaluation of the Competency of Relations

We are including a list of those skills involved in the competency of *Relations*. We are also asking you to evaluate this competency from your supervisee using the format presented below. Please discuss the evaluation with the student and send a copy to our clinical practica coordinator no later than the month of October and March each semester.

According to ADPTC¹, the novice student should possess and demonstrate a set of personal characteristics, intellectual and personal Skills:

Interpersonal skills: ability to listen and be empathic with others; respect for/interest in others' cultures, experiences, values, points of view, goals and desires, fears, etc. These skills include verbal as well as non-verbal domains. An interpersonal skill of special relevance is the ability to be open to feedback.

Cognitive skills: problem-solving ability, critical thinking, organized reasoning, intellectual curiosity

Affective skills: affect tolerance; tolerance/understanding of interpersonal conflict; tolerance of ambiguity and uncertainty.

Personality/Attitudes: desire to help others; openness to new ideas; honesty/integrity/valuing of ethical behavior; personal courage.

Expressive skills: ability to communicate one's ideas, feelings and information in verbal, non-verbal and written forms.

Reflective skills: ability to examine and consider ones owns motives, attitudes, behaviors and one's effect on others.

Personal skills: personal organization, personal hygiene, appropriate dress.

PONCE HEALTH SCIENCES UNIVERSITY
Master of Science in School Psychology Program²
Evaluation of Students Competency of Relations

Student Name: _____

Date: _____

Practicum Site _____

Supervisor Name: _____

Supervisor Signature: _____

Each student is evaluated on the following dimensions at the conclusion of each course with a 5-point scale as indicated below. See rating explanation below.

- | | |
|-----------------------|-------------------|
| 1 = unacceptable | 4 = average |
| 2 = poor | 5 = above average |
| 3 = needs improvement | |

Dimension	Rating	Comments Please explain any score of '1', '2', or '3'
1. Respectful Interpersonal Behavior Towards Supervisor(s) Peers		
2. Punctuality/Attendance		
3. Level of Participation/Preparedness		
4. Use/Integration of Theory with Practice		
5. Clinical Sensitivity		
6. Sensitivity and Awareness		
7. Insight and Use of Self		
8. Appropriate Affect Modulation		
9. Ethical Competence		
10. Professional Values and Attitudes		
11. Organizational and Systems Awareness		
12. Openness to Feedback		
13. Written and Communication Skills		

Rating Explanation

5 = above average; 4 = average; 3 = needs improvement; 2 = poor; 1 = unacceptable

5= Above average: Student's performance was at an exceptionally high level. 4= Average: Student's performance was solidly competent and characterized by absence of difficulties. 3= Needs improvement: Student's performance was acceptable, but there were some weaknesses or concerns which, though minor, might require some remediation or corrective action, as noted in the comment section. 2= Poor: Student's performance was minimally acceptable; there was a major problem or some minor difficulties that identify a need for remediation/corrective action, as noted in the comment section. 1= Unacceptable: Student's performance was unacceptable; there were several major problems that identify a need for remediation/corrective action, as noted in the comment section.

Is a special review of this student warranted? Yes _____ No _____

Student has read this form and is aware that it will be used to evaluate his/her performance as part of the assessment of relationship competence:

Practicum Site Evaluation by Students

Training Year: _____ Date: _____

Student Name _____

Practicum Site _____

Please answer below, explain, elaborate and give suggestions when appropriate.

I. Supervision:

Supervisor's Name: _____

1. Was an assessment of your levels of clinical development performed by your supervisor at the beginning of this placement?
Yes____ No ____ Explain:
2. Was the amount of supervision adequate? (at least an hour of individual supervision per week)
Yes____ No ____ Explain:
3. Was supervision readily available?
Yes____ No ____ Explain:
4. Was the supervision challenging and of sufficient complexity for your levels of clinical development?
Yes____ No ____ Explain:
5. Was the feedback provided and the evaluation done on your work helpful?
Yes____ No ____ Explain:
6. Were there training needs not met through this placement?
Yes____ No ____ Explain:
7. How did this supervision compare with the one you received in other placements?

Much Better____ Better ____ About the Same ____ Worst____

Overall rating: (1= lowest; 10= highest) _____

Comments:

II. General Characteristics of the Agency:

1. Were the facilities adequate for carrying out your work? (i.e., space, equipment, support staff, etc.)

Yes____ No _____ Explain:

2. Was the Agency supportive of your development as a professional?

Yes____ No _____ Explain:

3. Was there freedom and flexibility to learn and gain new experiences?

Yes____ No _____ Explain:

4. Were you able to interact with other disciplines in ways that added to your understanding of their unique contributions and facilitated cooperation and mutual respect?

Yes____ No _____ Explain:

5. Was your caseload audited during the past year?

Yes____ No _____ Explain:

6. Did you receive feedback on the audit performed on your caseload?

Yes____ No _____ Explain:

7. Was this feedback a learning experience?

Yes____ No _____ Explain:

Overall rating (1 - 10): _____ Comments:

III: Diagnostic Experience:

1. Did you gain adequate experience in formulating diagnoses, doing mental status exams, and treatment planning?

Yes____ No _____ Explain:

2. Were you exposed to a variety of diagnostic categories?

Yes____ No _____ Explain:

3. Did you have an adequate mix of age, gender, and cultural cases?

Yes____ No _____ Explain:

Overall rating (1 -10): _____ Comments:

IV. Psychotherapy Experience:

1. Did you have a sufficient number of cases?
Yes____ No _____ Explain:
2. Was there an adequate variety of clinical cases?
Yes____ No _____ Explain:
3. Did you experience the case assignments as sequenced and graded in complexity as you developed in experience throughout your practicum?
Yes____ No _____ Explain:
4. Did your supervisors provided encouragement and help in conceptualizing cases?
Yes____ No _____ Explain:
5. Did you gain adequate knowledge about case management, managed care, and practical aspects of treatment?
Yes____ No _____ Explain:
6. Did supervision help you gain an understanding of your influence in the therapeutic process?
Yes____ No _____ Explain:
7. Were diversity issues (gender, religious or affectional orientation, socioeconomic), encountered through your therapy sessions.
Yes____ No _____ Explain:

Overall rating (1 -10): _____ Comments:

III. Psychological Assessment:

1. Did you get an adequate number of referrals for assessment?
Yes____ No _____ Explain:
2. Were the assessment cases sufficiently varied?
Yes____ No _____ Explain:
3. Were you given adequate experience with the major testing instruments?
Yes____ No _____ Explain:
4. Were there other test instruments that you would have liked to learn or increase your experience using?

Yes____ No _____ Explain:

5. Did you gain sufficient knowledge and ability in administering, scoring, interpreting psychological test and conceptualizing cases based upon such conceptualizations?

Yes____ No _____ Explain:

6. Did you attain adequate ability to write meaningful and accurate test reports in a timely manner?

Yes____ No _____ Explain:

7. Was the testing supervision adequate?

8. Yes____ No _____ Explain:

Overall rating (1 - 10): _____ Comments:

VI. Other Clinical Training Issues:

1. Did you gain skills and understanding in dealing with professional, ethical, and legal issues?

Yes____ No _____ Explain:

2. Did this practicum further your appreciation for cultural, ethnic, and socioeconomic diversity?

Yes____ No _____ Explain:

3. Did you have adequate opportunity for consultation and supervision?

Yes____ No _____ Explain:

Overall rating (1 - 10): _____ Comments:

Appendix E
Psychological Testing Policy

PONCE HEALTH SCIENCES UNIVERSITY
MASTER OF SCIENCE IN SCHOOL PSYCHOLOGY PROGRAM

STUDENT PRACTICE OF PSYCHOLOGICAL TESTING POLICY

All third-year students will provide evidence of the completion of at least 4 batteries of psychological tests including its corresponding psychological reports. The reports written for the required testing courses will not satisfy this requirement. To evidence this policy, the student must hand a copy of the report signed by their supervisor.

In the case that the practicum setting to which the student is assigned does not provide the opportunity for psychological assessment, the student will be assigned to a special rotation with supervision at the Center for Psychological Services or other center that provides this experience. The coordinator of practice and the director of CPS will be in charge of assigning cases and supervisors to these students. Those students with documented deficiencies in the testing area will be required to satisfy a remedial plan².

² The remedial plan may be completed during the second semester of the third year.
